

ALWAVIS CHECK

VARIO – Lube Oil Test Kit for 3 different tests

The test kit ALWAVIS CHECK contains basic analysis equipment required for quick, simple and accurate testing of the engine lube oil condition directly on site. The combination of three tests available to conduct (**water in oil, base number and viscosity comparison**) provides immediate information on the principal parameters of lubricating oil. The use of the test kit in routine operation enables efficient oil condition monitoring process and helps to make effective decisions regarding engine system maintenance at the right time.

Features:

Parameters to measure

- Water in oil
 - Measuring range: 0 – 1.0 vol.% H₂O
 - Measuring time: about 20 min.
 - Accuracy: +/- 3%
- Base Number
 - Measuring range: 0 – 150 BN
 - Measuring time: about 20 min.
 - Accuracy: +/- 1 BN
- Oil Viscosity
 - Measuring range: max. lube oil
 - Measuring time: about 3 min.

Benefits:

- Convenient size, easy to transport
- Simple, quick and efficient tests
- Direct read-out of test results
- Easy to use even for untrained personnel

The following test devices are included:

V 5108 TWIN CHECK
V 200 VISCOSITY COMPARATOR
